**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08/02/2006 has been entered.

2. The Amendment/Remarks filed by Applicant on 08/02/2006 has been entered.

3. The rejection of claim 20 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention is withdrawn.

**Claim Rejections - 35 USC § 103**

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 20-22 and 36 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Lok et al., U.S. Patent No. 4,440,871 (hereinafter "Lok") in view of Davis, EP 0 463 793 A2 (hereinafter "Davis"). Lok teaches a silicoaluminophosphate composition and template. See Lok, Summary of Invention. The

Art Unit: 1713

present invention differs from Lok in that the present invention requires a polymeric base. Davis teaches in analogous art a crystalline aluminophosphate mixed with silicon and employed in olefin polymerization. See Davis, page 6, lines 23-26. In view of Davis, one having an ordinary skill in the art would be motivated to modify Lok by using silicoaluminophosphate composition and template in a polymer (oligomer). Such modification would be obvious because one would expect that the use of silicoaluminophosphate composition and template as taught by Lok would be similarly useful and applicable to the composition taught in Davis.

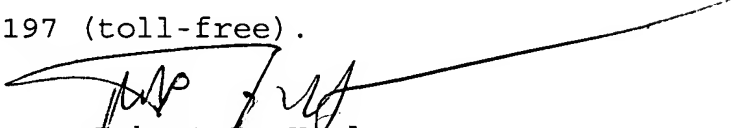

7. Claims 31-33, 34-35 and 37 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert D. Harlan whose telephone number is (571) 272-1102. The examiner can normally be reached on Mon-Fri, 10 AM - 8 PM.
